Filo _Table lamp

Compact, graphic, and adjustable, the Filo table lamp is perfect for desks, bedside tables, and reading corners. Its painted metal structure with a matte finish, available in red, white, or black, forms a light and slender arc. It features an E27 socket with an exposed bulb as a defining element. The upper arm rotates up to 200°, allowing you to direct the light where needed. Filo is a modern table lamp designed for those who seek a solution that is both functional and decorative, adding personality without overwhelming the space. Filo is supplied with a specially designed LED bulb: the LED is embedded in a silicone dome that acts as a lens, directing the light downwards and ensuring excellent illumination of the surface, without lateral glare. The result is a comfortable, directional light, perfect for everyday activities. The black cable completes the design with balance and clarity. Used alone or paired with other models in the collection, it enhances interiors with subtle character and style.
