## Endless Twilight

Tracing clean lines, the new Peak lamp is born from the overlapping of four unequal cylinders. It is a slender and vertical composition with a metal body resting on a steel or marble base to ensure stability. The design offers a soft and warm light, projected from the upper

disc and controlled by an integrated lightweight ring. A static and visually ethereal piece, available in a black, mink or burgundy finish. The series has two floor lamp versions in two different heights, a table lamp and a wall light.
