PEARLS - NEW FINISH 2022

## PEARLS

This year we are introducing a brand new finish for our PEARLS product range. As addition to the classic glossy white opal glass we are now offering transparent frosted glass with a silky matte etched finish. The new finish is complementing the successful „classic“ PEARLS-look, yet with a „lighter“ appearance to merge with modern architecture.

Additionally to the new finish we are offering a new LED fitting for the PEARLS range. For a more cozy and warm lighting atmosphere we have developed a new module with 2200K. Of course we are also offering 3000K and 4000K if needed for your project!
