Care and Maintenance

For cleaning of wooden & metal surfaces, advantageously use a detergent, or mild pH neutral detergent and lukewarm water in a well wrung cloth. Then wipe off with clean water and wipe dry.

To preserve the look and finish you should be aware not to use:
– Alkaline or aggressive cleaners,
– Solvent
– Preparations containing abrasives,
– Abrasive tools.

Note that freshly painted surfaces are susceptible to scratching. Surface final resistance is only achieved after about a month. Tape and other foreign substances such as, for example, adhesive and moisturizers can soften the treated surface and cause peeling /paint drop. Please also avoid direct sunlight. Direct contact with too hot or cold object may also harm the surface.
